SUMMARY

Results-driven **Data Engineer** with experience in the **banking, telecommunications, and energy** sectors. Skilled at leading end-to-end data projects, mentoring teams, and developing reusable frameworks in **Scala, Python, and Java**. Strong background in both **Cloudera** and **Azure** ecosystems, with a focus on **Spark, Kafka, and Delta Lake** architectures. Eager to deepen expertise in **cloud architectures and multi-cloud providers**, with a proven ability to **adapt quickly** to new technologies, environments, and evolving business needs.

WORK EXPERIENCE

Santander Portugal — Lisbon, Portugal

Big Data Engineer — May 2021 – Present

- Senior Data Engineer and technical lead overseeing full project lifecycles — from architecture and estimation to implementation and delivery.
- Developed and maintained reusable data frameworks in **Scala, Python, and Java** in the Cloudera ecosystem, widely adopted across the bank.
- Designed scalable ETL frameworks and pipelines on **Azure Databricks** using **Spark, Delta Lake**, and **MongoDB Atlas**.
- Built **Spring Boot microservices** to support digital banking and data-driven workflows, improving automation and integration performance.
- Led mainframe offloading to **Oracle** and **MongoDB** using **IBM CDC** and **Kafka Confluent**, reducing legacy reliance and improving data freshness.
- Championed adoption of **Kafka, KStreams**, and the Confluent stack, enabling real-time data processing and streaming analytics.
- Interviewed and helped onboard new engineers, ensuring technical fit and supporting mentorship within the team.
- Defined best practices for data governance, DevOps pipelines, and reusable framework design to ensure quality, compliance, and maintainability.

Xpand IT — Lisbon, Portugal

Big Data Engineer — Jan 2019 – May 2021

- Designed and implemented large-scale ingestion and transformation pipelines in **Scala, Java, and Spark** within the Cloudera ecosystem (Hive, Kudu, HBase, Impala, Kafka, Solr, Yarn).
- Developed CDC-based ingestion frameworks using **StreamSets, Kafka**, and **Sqoop**, automating data integration workflows.
- Built a **Cloudera Metrics Collector** in Scala, Spark, and Kudu, exposing predictive cluster insights through a **Spring Boot REST API**.
- Delivered proofs of concept for large financial institutions, including full Cloudera cluster implementations and ingestion solutions.
- Created internal libraries for ingestion, transformation, and monitoring, standardizing engineering practices across teams.
- Worked with **GoCD, NiFi**, and Kerberos-secured environments, ensuring secure and reliable processing in production.

Alter Solutions — Lisbon, Portugal

Software Developer — Oct 2017 – Dec 2018

- Developed and maintained enterprise solutions on the **Oracle CCB** platform using Java, JavaScript, and SQL.
- Improved data integrity and performance through ETL scripts and database optimization.
- Collaborated with cross-functional teams to turn business requirements into robust, maintainable systems.
- Built strong foundations in backend development, data modeling, and SDLC best practices.

EDUCATION

Instituto Superior Técnico (IST) — Lisbon, Portugal

MSc in Computer Science and Engineering — Jul 2016 – Oct 2017 · Distributed Systems & Information Systems

BSc in Computer Science and Engineering — Oct 2010 – Jul 2016

European Innovation Academy (EIA) — Porto, Portugal

Participant — Jul 2022 – Aug 2022 · Entrepreneurship & Innovation

CERTIFICATIONS

- CCA Spark and Hadoop Developer, Cloudera — License 100-024-207 (Expired Feb 2023)
- Azure Databricks Essentials, Microsoft — Expired Nov 2022

TECHNICAL SKILLS

Languages: Scala, Python, Java, SQL, JavaScript, Shell

Big Data Ecosystems: Cloudera (Hive, Kudu, HBase, Impala, Yarn, Solr, Kafka), Azure (Databricks, Delta Lake, Data Factory, Synapse)

Frameworks & Tools: Spring Boot, Spark, StreamSets, NiFi, GoCD, Control-M, Maven, Git

Databases: Oracle, MySQL, Netezza, Hive, Impala, HBase, MongoDB Atlas

Focus Areas: Data Architecture, ETL Frameworks, Streaming Pipelines, CDC, DevOps, Data Governance

COMMUNITY & EXTRACURRICULARS

- CoderDojo Lisbon — Mentor (2015–2016), teaching Scratch, LEGO Mindstorms EV3, and Python to kids.
- Portuguese National Ice Hockey, HC Porto, Sintra Knights International — Competitive Ice/Inline Hockey Player. Date: All my life.
